The MK⁴EVAC+CHAIR[®]

The EVAC+CHAIR is the original emergency evacuation chair. There are plenty of copycat competitors, but as usual, the original is still the best. Here's why:

Our MK⁴ evacuation chair is simple. It works every time. It is intuitive so anyone can use it, even without training or instruction. There are no complicated add-ons to break. No gimmicky features to snag or fail. It simply works, effectively, easily, and does what it was designed to do: save lives.

Key EVAC+CHAIR features include:

Speed: You can grab the EVAC+CHAIR off the wall and have it unfolded in less than 10 seconds.

Ease of Use: It simply unsnaps from its included wall mount, and unfolds in one easy step. It's ready to go seconds later.

Simplicity: Don't let the simple, plain design fool you: this is still the best evacuation chair in the world. Its plain looks and construction are by design. The fewer parts or features, the less there is to learn or to go wrong.

Size: Our EVAC+CHAIR is the smallest of any similar products and weighs in at only 19 pounds! That makes it a lot lighter (which makes it that much easier for anyone to use.) It also means that it snaps to the wall very unobtrusively so that it doesn't get in the way.

High Capacity: The EVAC+CHAIR weighs only 19-lbs but has a 400-lb capacity!

Stand Alone: It requires no attachments to stairs or side railing.

Portable: Carry it easily to any place you need.

Nothing Required. No assembly or installation is required. It comes ready-to-use out of the box (though we do include a convenient wall mount if you prefer to permanently mount it next to stairs.

Flow: The EVAC+CHAIR was specially designed to be able to keep up with the flow of foot traffic during an emergency evacuation. Using the EVAC+CHAIR won't clog your stairwell and prevent others from evacuating.

Safety: The EVAC+CHAIR utilizes an exclusive automatic braking system to prevent it from 'getting away from you.' This ensures there will never be an uncontrolled decent.
